

Minutes of the Meeting

Date: 23 January 2024

Meeting Proceedings:

1. Heroku Platform Overview:

- Discussion on Heroku, emphasizing its nature as a Platform as a Service (PaaS) and its capabilities for infrastructure and customization. It was noted that Heroku operates on two layers, namely application and data.
- Proposal to deploy the project on Heroku ; however, it was later rejected due to cost implications.

2. Docker Implementation:

- The concept of Docker, described as encapsulating code into a "black box," was introduced.
- Research and familiarize with Docker implementation.
- Learn and understand how to dockerize files.
- Plan to deploy Docker into Heroku, which was later rejected because Heroku was not needed.

3. Translation of Django Code into Node:

- Suggestion to translate existing Django code into Node.
- After deliberation, it was acknowledged that this task would be laborious and might not yield significant benefits. As a result, this idea was discarded.
