

Client Meeting 5(20 Feb 2024)

Attendees : -

- Umang Aggarwal
- Sanchit Jalan
- Karan Nijhawan
- Sreeja Palle
- Vaishnavi Reddy

Topics Discussed : -

- During the client meeting, we provided a detailed walkthrough of the Label Studio codebase, focusing primarily on clarifying its structure and functionalities.
- The main objective of the meeting centered around this walkthrough, ensuring that the client had a comprehensive understanding of the platform.
- One of the key tasks assigned to us during the meeting was to address an issue concerning the limitation on uploading only 100 images at a time. We were tasked with rectifying this error to enhance the user experience and streamline the image uploading process.
- Additionally, the client outlined their final requirements, emphasizing the need for implementing a feature that allows images to be rotated 360 degrees. This functionality was deemed essential for users to have greater flexibility and control over image manipulation .
- To ensure timely completion of the assigned task, we were given a deadline of 5 days to fix the image uploading error. This timeframe was established to

maintain project momentum and meet client expectations for prompt resolution of issues.

- Furthermore, it was agreed that the next meeting would be scheduled after the mid-semester exams.
